                                                                                                                                                                                                                                                                                                                               GTP-binding protein MEL - mouse

NyAlternate names: gene MEL protein

C,Species: Mus sp. (mouse)

C,Species: Mus 1996 #sequence_revision 02-Aug-1996 #text_change 02-Feb-2001

C,Accession: 178851

R;Nimmo, E.R.; Sanders, P.G.; Padua, R.A.; Hughes, D.; Williamson, R.; Johnson, I.

A;Title: The MEL gene: a new member of the RAB/YPT class of RAS-related genes.

A;Reference number: 158355; MUID:91360267; PMID:1886711
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ö

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

SwissProt_42:* Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

## ALIGNMENTS

s of synaptic vesicle membrane flow within the nerve terminal (By similarity). SIMILARITY: Belongs to the small GTPase superfamily. Rab family. This SWISS-PROT entry is copyright. It is produced through a collaboration between the Swiss Institute of Bioinformatics and the EMBL outstation the European Bioinformatics Institute. There are no restrictions on its use by non-profit institutions as long as its content is in no way modified and this statement is not removed. Usage by and for commercial entities requires a license agreement (See http://www.isb-sib.ch/announce/or send an email to license@isp-sib.ch).

-1. Biol. Chem. 267:22693-222693(1992).
-1. FUNCTION: May act in concert with RAB3A in regulating aspects of spraghtic vesicle membrane flow within the nerve terminal.
-1. TISSUE SPECIFICITY: Expressed predominantly in neural tissues.
-1. TISSUE SPECIFICITY: Expressed predominantly in neural tissues.
-1. SIMILARITY: Belongs to the small GTPase superfamily. Rab family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 0; Gaps

"RAB GTPases expressed in human melanoma cells.";
Biochim. Biophys. Acta 1355:1-6(1997).
-!- FUNCTION: May be involved in vesicular trafficking and neurotransmitter release (By similarity).
-!- SIMILARITY: Belongs to the small GTPase superfamily. Rab family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1; Gaps

Armstrong J., Thompson N., Squire J.H., Smith J., Hayes B., Solari R., "Identification of a novel member of the Rab8 family from the rat basophilic leukaemia clilline, RBL.2H3.";
J. Cell Sci. 109:1265-1274(1996).
-!- FUNCTION: May be involved in vesicular trafficking and neurotransmitter release (By similarity).
-!- TISSUE SPECIFICITY: Highest levels of expression in the spleen, testis and brain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1 MAKQYDVLFRLLLIGDSGVGKTCLLCRFTDNEFHSSHISTIGVDFKMKTIEVDGIKVRIQ

Sanger Kenopus tropicalis BST project 2001

TROPICALIS_SEQUENCE ID: TEB9119f07.plkSP6

Sequencing primer: SP6

This sequence is from a Xenopus Gene Collection (XGC) library

constructed by Aaron M. Zorn.

CDNA was oligo dT primed from Sug of poly A+ RNA from egg.

ECORI-NOIL cut cDNA was then ligated into pCS107 with ECORI at the

S' end and Noil at the 3' end.

Vector: pCS107; Site 1: ECORI; Site_2: NotI

Host: Escherichia coli XL1-blue.
